

Take Learners from Zero Linux Knowledge to Linux Certifications

Where: Coastline Community College

When: June 26, 2017 Thru June 30, 2017

Course description: "Linux workshop: Network Development Group, NDG, has invested in courses and labs to help your learners to go from zero knowledge of Linux to certified. NDG Linux Unhatched is short module that can be included in any course to teach learners. Linux Unhatched aligns to the Linux learning objectives for CompTIA A+. NDG Linux Essentials helps a new learner become comfortable with the Linux command line interface. Linux I and Linux II teaches the learning objectives for the LPI LPIC-1 and CompTIA Linux+ powered by LPI exams. Learners that are motivated can pursue the Red Hat certifications at academic institutions offering the Red Hat Academy. NDG NETLAB+ now supports both Linux+ labs and Red Hat Academy program labs for RHA 124, 134 and 254. The combination of these courses and labs give your learners a pathway to become a Linux professional. This session will cover the basic information for using this content in your classroom."

Instructor:

Gonda Watson has been an instructor in the Business and Technology Division at Stanly community College for the past 11 years. He holds a Bachelor degree in Civil Engineering from the University of Liberia, West Africa and Masters in Computer Information systems from Strayer University. He holds the Linux Essentials Certification, Adobe Certifications, and has

completed Cisco Networking Academy CCNA 1-4 and VMware Instructor courses. He currently teaches VMware, Security Concepts and Linux Essentials courses at Stanly Community College.
