

The logo features the Cisco logo at the top, followed by the word "DEVNET" in large, bold, blue letters, and "Certification" in a smaller, blue font below it, all centered between two horizontal lines.

WASTC 2020 Faculty Development Weeks

DevNet Fundamentals Everything you need to know for the Cisco DevNet Associate exam 200-901 DEVASC

Dates: Fully Online, June 15-19, 2020

Times: Daily from 9 -11 am and 1 -3 pm, Office Hours 3 -4 pm PST

Workshop Overview:

In this workshop we will cover all the topics for the Cisco DevNet Associate exam: introduction to software development and design, understanding and using APIs, application deployment and security, infrastructure automation, network fundamentals and Cisco platforms such as Cisco Meraki, Cisco SD-WAN, Cisco DNA Center, Cisco NSO, Cisco UCS, Cisco Webex Teams, etc. This is an introductory workshop so we will cover all these topics from a beginner's perspective. For the hands-on activities basic knowledge of Python is helpful but not mandatory.

All attendees are encouraged to bring their own laptops to work on. You will only need an Internet connection and a browser.

*We must have a full class by April 15, or we will have to cancel this offering, so please sign up ASAP.

Instructor/Trainer: Adrian Iliesiu (CCIE R&S No. 43909) is a Cisco DevNet Technical Leader that specializes in network programmability and automation, SD-WAN, Cisco DNA Center and Data Center technologies. Before joining Cisco, he worked as a systems administrator, senior network engineer, and team leader throughout Europe and North America. He holds a BS from Technical University of Cluj-Napoca in Electronics and Telecommunications, a MSc from Politehnica University of Bucharest in Telecommunications Networks and has 15+ years of IT and telecom industry experience.
